Dr. F.A Kabagambe-Kaliisa, Permanent Secretary of the Ministry of Energy & Mineral Development (MEMD), said that the attraction of seven bidders is significant taking into consideration the current low Global Oil and Gas prices. He explained that the good success of the bidding process is largely attributed to geological success within the Albertine Graben and the fact that majority of the blocks on offer have proven oil and gas potential.

The Permanent Secretary further elaborated that the evaluation of the bids will be primarily based on the proposed work program, Technical and Financial capability, National Content, Health Safety and Environment, Proposed Royalty and Signature Bonus. He added that

Government will conclude the licensing round by negotiating with successful bidders, sign Production Sharing Agreements and award Exploration licenses by the end of June 2016.

The bidding document comprised of the Request for Proposal, Model Production Sharing Agreement 2015 (MPSA), Model Confidentiality Agreement for sale of data, Petroleum (Exploration, Development and Production) (Data Sale) Regulations 2014 and Petroleum (Exploration, Development and Production) (Data Sale) (Amendment), Regulations 2015.
